| • NextJS | • NodeJS | • WebSockets |
| • PeerJS | • Bootstrap | • Git |
| • WebRTC | • MongoDB | • Firebase |

Projects

Title Social Media Application

- It helps to connect with people that are on the same platform.
- Send a friend request and chat with them if they accept the friend request.
- Make video calls to your friends.
- Used **Reactjs, Firebase, Nextjs, MongoDB, Nodejs, SocketIO and PeerJS**
- Link -> <https://frontend-pankajfb.vercel.app/>

Title File Sharing Application

- It helps to share files over the peer-to-peer connection without the need of any server between those two endpoints.
- Used **HTML, CSS, JavaScript, WebRTC and PeerJS**

Title Video calling Application

- It helps in connecting two peers and let them share their media stream with each other without the use of any server between them which makes the video calling quality better.
- Used **HTML, CSS, JavaScript, WebRTC and PeerJS**

Title Articles posting website

- It has a feed-like section where all the articles can be seen.
- Used **HTML, CSS, JavaScript, ReactJS, NodeJS, and Mong**
